About LATRS

LATRS is a new application to store laboratory test results. It has been built especially for use at the Mae Tao Clinic Laboratory. LATRS can store **any** sort of test results, and report on them. LATRS will make reporting of test results much quicker and easier.

LATRS can be accessed from any computer connected to the Mae Tao Clinic network. To access the system, visit:

<http://192.168.1.200:3000>

For training, a practice version of the system will be used. This system is available at:

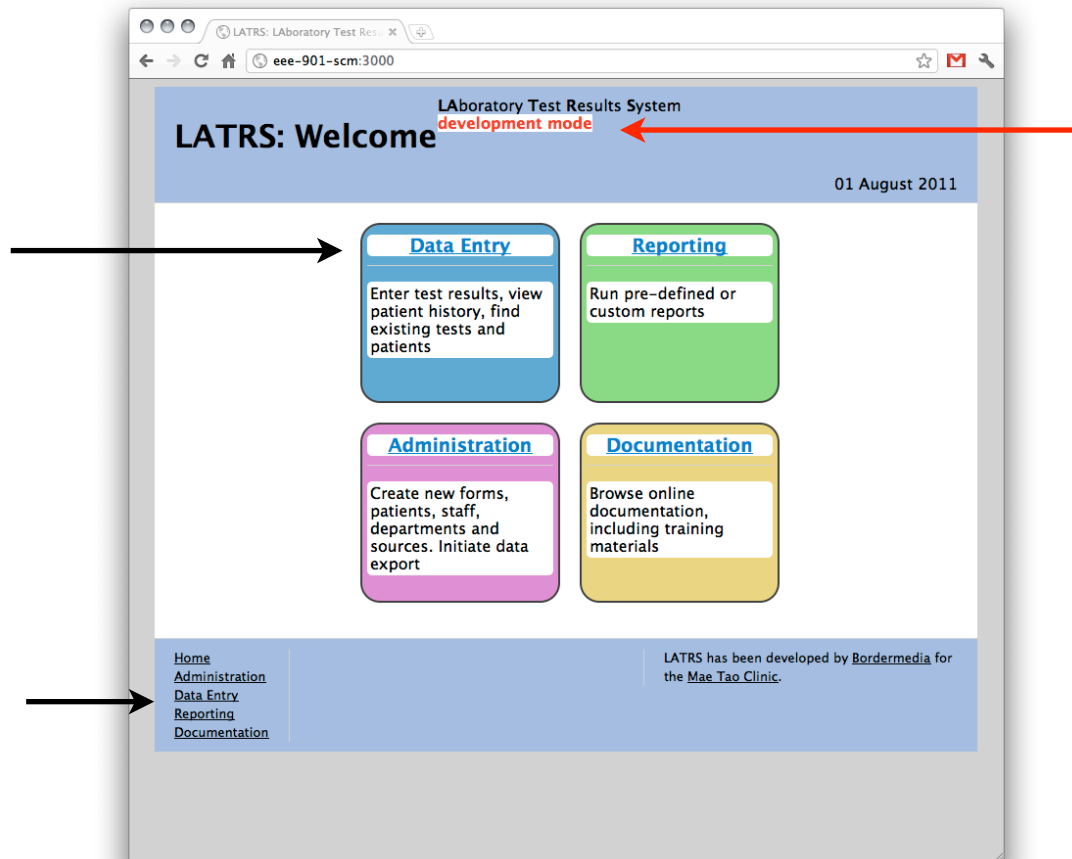

<http://192.168.1.200:3030>

LATRS works best in the Google Chrome browser, or the Firefox browser. There are problems using the Internet Explorer browser. Please always use Google Chrome or Firefox!

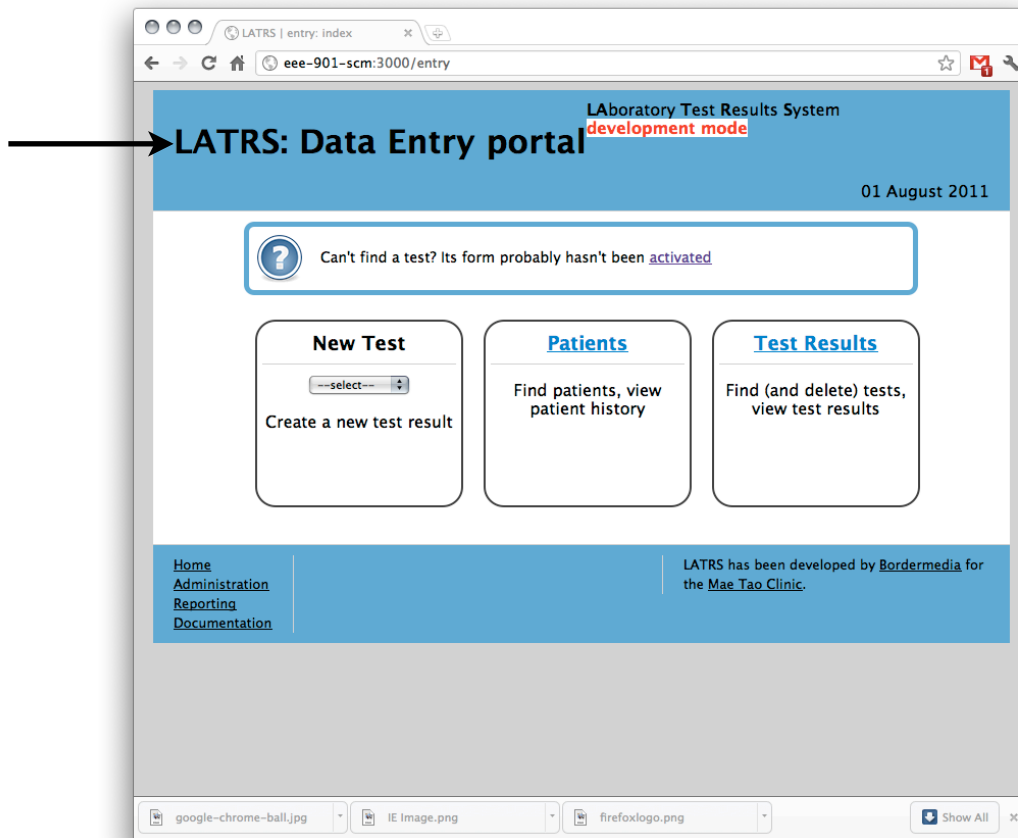

About Data Entry

Data Entry is just one part of the LATRS system. Data Entry is how information gets into the LATRS system. From the Data Entry section, you can also search for previous tests and patients, and look up a patient's test history.

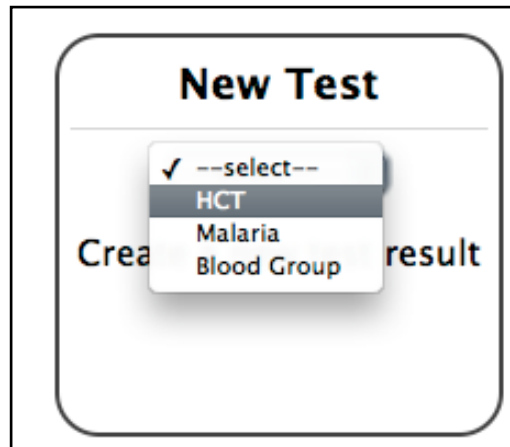

Data Entry Home

There are 3 parts to the Data Entry section: Entering a new set of test results, viewing patients, and viewing existing test results:

Enter new test results

Select the type of test to enter results for. To begin, we will choose a very simple one: HCT

LATRS | testables: new

LATRS has been developed by [Bordermedia](#) for the [Mae Tao Clinic](#).

New test: Basic information

All tests require the same basic information:

- Patient (by RN)
- Department (by name)
- Staff / tester (by name)
- Time in (date and/or time)
- Time out (date and/or time)

Start by entering the Patient's RN. LATRS uses the HIS patient registry for patient information

Enter the first 3 numbers and the system will look up matching RNs automatically:

The screenshot shows a form with the following fields and values:

Patient RN	201
Depa	2010007
Staff	2010008
Time	2010009
Time out	2010010
	August 1, 2011 10:37 AM
	August 1, 2011 10:37 AM

A dropdown menu is open for the 'Patient RN' field, showing suggestions: 2010007, 2010008, 2010009, and 2010010. The first suggestion, 2010007, is highlighted in yellow.

Select the right one, and the patient details are displayed to the right:

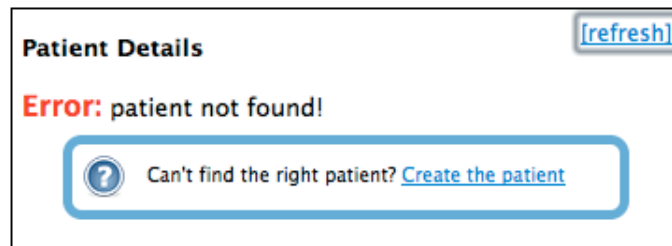

The screenshot shows the 'Patient Details' form for patient Cha Thar. The form includes a 'Patient history' section and a 'Patient details' section. The patient details are as follows:

Patient RN	2010007
Age	34 yrs, 1 mths, 0 days
Birthdate	1977-07-01
Gender	Male
Ethnicity	Burmese
Location	TH-Mae Sot

Below the patient details, there are two buttons with question marks:

- Are these details incorrect? [Update this patient](#)
- Can't find the right patient? [Create the patient](#)

If the RN cannot be found, you will be informed, and can create one manually:

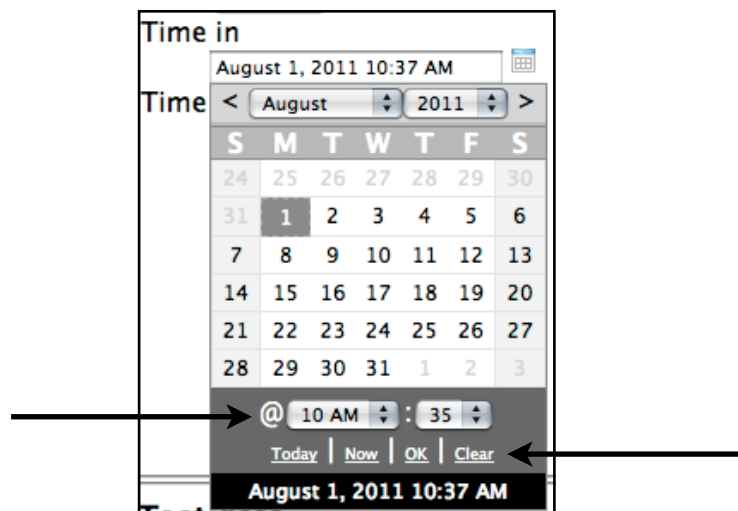

The screenshot shows a web form titled "Patient Details" with a "[refresh]" button in the top right corner. Below the title, a red error message reads "Error: patient not found!". At the bottom of the form, there is a blue-bordered box containing a question mark icon, the text "Can't find the right patient?", and a blue hyperlink that says "Create the patient".

If the details aren't correct, you can manually update them, **BUT** it would be better to inform HIS.

Once a patient is selected, LATRS looks for the last test result entered for this patient, and will automatically update the **Department**, **Staff** and **Time** fields with the information provided last time. This can save some time in entering new tests. You can change these though!

The "time in" and "time out" fields are **not required** - you can leave them blank. Speak to your supervisor to find out what you should do.

The time fields will always default to the time and date **right now**. To change this information, click the calendar icon to the right of the field:

The screenshot shows a "Time in" field. At the top, it displays "August 1, 2011 10:37 AM" next to a small calendar icon. Below this is a "Time" section with a date and time picker. The date is set to "August" and the year to "2011". Below the date picker is a calendar grid showing the month of August. The time is set to "10 AM" and "35" minutes. At the bottom of the time picker, there are links for "Today", "Now", "OK", and "Clear". A black arrow points from the left to the time picker, and another black arrow points from the right to the "Clear" link. The bottom of the picker shows "August 1, 2011 10:37 AM".

You can now choose any date and time you want. To just store a date, and not the time, select "-" as the hour. To clear the field, use the "Clear" link. When you are ready, click the "OK" link.

New test: data

The data specific to this test will be entered underneath the basic information:

The screenshot shows a web browser window with the URL 'eee-901-scm:3000/entry/testables/new/1'. The page title is 'LATRS: Data Entry portal' and it indicates 'development mode'. The date '01 August 2011' is shown in the top right. The main heading is 'HCT'. Below it is a 'Basic information' section with fields for Patient RN, Department, Staff (set to 'Steven'), Time in (August 1, 2011 10:37 AM), and Time out (August 1, 2011 10:37 AM). To the right is a 'Patient Details' box with a '[refresh]' link and a prompt to 'Enter the patient's RN to retrieve details'. Below this is a button that says 'Can't find the right patient? Create the patient'. The 'Test data' section has a red label 'HCT Value' followed by a text input field and a '%' symbol. At the bottom of the form is a 'Save changes' button. The footer contains links for Home, Administration, Reporting, and Documentation, and a note that LATRS was developed by Bordermedia for the Mae Tao Clinic.

Some forms have lots of information to enter. HCT has only one - the HCT Value:

This is a close-up of the 'Test data' section. It shows the red text 'HCT Value' followed by a text input field and a '%' symbol.

This is a **required** field - you **must** supply a value for this field. All required fields will be listed in **red text**.

When you have entered all the information, click the “save changes” button at the bottom of the form:

This is a close-up of the 'Test data' section, showing the red text 'HCT Value' followed by a text input field and a '%' symbol. Below the input field is a 'Save changes' button.

If you don't supply a value for a required field, the test will not be saved, and you will be told why:

The screenshot shows the 'LATRS: Data Entry portal' header with 'Laboratory Test Results System' and 'development mode' in red. The date '01 August 2011' is in the top right. A red box contains the message 'Validation Errors:' followed by a bullet point: '• "HCT Value" can't be empty'. A red 'X' icon is in the top right of the box. Below the box, the text 'HCT' is visible.

The HCT value also has to be a number. If you don't supply a number, you will get a different sort of error:

The screenshot shows the 'LATRS: Data Entry portal' header with 'Laboratory Test Results System' and 'development mode' in red. The date '01 August 2011' is in the top right. A red box contains the message 'Validation Errors:' followed by a bullet point: '• "HCT Value" must be a number'. A red 'X' icon is in the top right of the box.

You can remove the error message by clicking the red cross on the right. You still need to fix the problem though!

When you have saved the test correctly, you will be returned to the Data Entry homepage:

The screenshot shows the 'LATRS: Data Entry portal' header with 'Laboratory Test Results System' and 'development mode' in red. The date '01 August 2011' is in the top right. A green box contains the message 'Data entry complete' with a red 'X' icon. Below this is a blue box with a question mark icon and the text 'Can't find a test? Its form probably hasn't been [activated](#)'. There are three main sections: 'New Test' with a dropdown menu and the text 'Create a new test result'; 'Patients' with the text 'Find patients, view patient history'; and 'Test Results' with the text 'Find (and delete) tests, view test results'. At the bottom, there is a blue footer with links: 'Home', 'Administration', 'Reporting', 'Documentation', and a note: 'LATRS has been developed by [Bordermedia](#) for the [Mae Tao Clinic](#)'.

New test: Malaria

The Malaria test is a bit more complex. Let's create one now:

Test data

Outcome

Neg

PV

• Classifier

s
t
g

PF

• Classifier

s
t
g

PM

• Classifier

s
t
g

PO

• Classifier

s
t
g

There are actually more fields available. Each **P** field has an **RBC Infection** field, but it will only show when the **P** value is **+++** or **++++**:

Test data

Outcome

Neg

PV

• Classifier

s
t
g

• RBC Infection

+++

%

The **classifier** field is interesting as well. It can have multiple selection. To select **s** AND **g**, click one, then hold down the **CTRL** button, and click the other one.

PV

++++ • Classifier  • RBC Infection %

REMEMBER: these are examples ONLY. “Classifier” will not be the only field that can have multiple selections. “RBC Infection” is not the only field that will appear and disappear. “HCT Value” is not the only required field.

Subtests

It is very common for a patient to have more than one type of test done at a time. To make entering results for a patient even easier, some tests have **subtests**. These are the same as normal tests, but they don't require the "basic information" (Patient, Department, Staff, Time In, Time Out) to be repeated all the time.

In the example below, "HCT" is a subtest. Subtests are disabled by default.

This means the system will not expect you to enter data for subtests unless you want to.

Enable the test by clicking the "Enable" link, or the title of the subtest:

Subtest: HCT

 This form is **disabled**. [Enable](#)

Enabled tests can be disabled as well. Just click the link, or the title again:

Subtest: HCT

 This form is enabled. [Disable](#)

HCT Value
 %

Enabled subtest will be automatically saved with all the correct "basic information". The information being saved in these subtests will be checked for correctness, just like a normal test. The "HCT Value" field is red, so **if this subtest is enabled**, you **must** supply a value for this field.

Test Results

Let's go back to the Data Entry homepage, and view the test results in the system:

Test Results: sorting and searching

From here we can view test results. We can sort the list of tests by clicking on the column title: click on **Requested** to sort all tests by the “time in” date .

We can also search through all tests. Click the search link to the right:

The screenshot shows a web browser window with the URL `eee-901-scm:3000/entry/testables/list`. The page title is "LATRS: Data Entry portal" and it indicates "development mode". The date "01 August 2011" is displayed in the top right. The main section is titled "Test Results" and includes a search bar with a "Search" button and a "Reset" link. Below the search bar is a table of test results. The table has columns: Requested, Type, Department, Staff, Patient (RN), Time taken, and actions (Sub-tests, Show, Delete). The table contains 8 rows of data. At the bottom of the table, it says "8 Found". The footer of the page includes a "Home" link and the text "LATRS has been developed by Bordermedia for".

[Home](#) LATRS has been developed by Bordermedia for

Click the “search” button to perform the search. You can click the “Reset” link to view all tests again. To close the search box, use the green cross to the right.

Test results: show

The main window only shows some of the information for each test result. To see all the information, click the “Show” link for that test:

The screenshot shows a web browser window with the address bar displaying 'eee-901-scm:3000/entry/testables/list'. The page title is 'LATRS: Data Entry portal' and it includes a 'development mode' warning. The date '01 August 2011' is shown in the top right. The main content area is titled 'Test Results' and features a table with columns: Requested, Type, Department, Staff, Patient (RN), and Time taken. The first row shows a Malaria test requested on July 20, 2011, at 7:36 PM, performed by Steven McPhillips (RN: 123), with a time taken of 0 hours, 9 minutes, and 59 seconds. To the right of the table are links for 'Sub-tests', 'Show', and 'Delete'. Below the table, a detailed view of the HCT test is shown, including fields for Requested, Department, Staff, Patient (RN), and Time taken, along with the HCT Value of 4%. Below this, patient details for Steven McPhillips are listed, including Patient RN (123), Age (32 yrs, 7 mths, 23 days), Birthdate (1978-12-08), Gender (Male), Ethnicity (Australian), and Location. A 'Close' link is provided at the bottom of the patient details section. The bottom of the page shows a second row in the table for a Blood Group test requested on July 20, 2011, at 7:41 PM, also performed by Steven McPhillips (RN: 123), with a time taken of 0 hours, 9 minutes, and 59 seconds. Links for 'Sub-tests', 'Show', and 'Delete' are also present for this row.

All the basic test information will be displayed on the left, with the other information being on the right.

Patient details are also displayed below.

Click the green cross to the right to return to the normal list view.

Deleting a test

If you have entered a test incorrectly, you can always delete it from this page. Find the test you want to delete, and click the delete link next to it.

Be careful; once a test is deleted, it cannot be recovered. There is no “undo”!

To make sure you are not deleting the wrong test, the system will ask for confirmation:

The screenshot shows a web browser window with the address bar displaying 'eee-901-scm:3000/entry/testables/list'. The page title is 'LATRS: Data Entry portal' and it includes a 'development mode' banner. The date '01 August 2011' is shown in the top right. A 'Test Results' table is visible on the left, and a confirmation dialog is centered on the screen.

LATRS has been developed by [Bordermedia](#) for the [Mae Tao Clinic](#).

The list of subtests can be sorted, searched and opened just like the main list of tests.

Patients

Let's go back to the Data Entry homepage, and view the patients in the system:

Patients: sorting and searching

From here we can view patient information, including patient history. We can sort the list of patients by clicking on the column title: click on **Name** to sort all patients by name.

We can also search through all patients. Click the search link to the right:

The screenshot shows a web browser window with the address bar displaying "LATRS | patients: list" and "eee-901-scm:3000/entry/patients/list". The page title is "LATRS: Data Entry portal" with a sub-header "Laboratory Test Results System development mode" and a date "01 August 2011".

The "Patients" section features a search form with the following fields:

- Name: Contains [text input]
- Patient RN: Contains [text input]
- Gender: -select- [dropdown]
- Ethnicity: Contains [text input]
- Birthdate: [date input] - [date input]

Below the form are "Search" and "Reset" buttons. A green cross icon is visible in the top right corner of the form area.

The search results are displayed in a table with the following columns: Name, Patient RN, Age, Gender, Ethnicity, and History Show. The table contains 6 rows of patient data:

Name	Patient RN	Age	Gender	Ethnicity	History Show
Steven McPhillips	123	32 yrs, 7 mths, 23 days	Male	Australian	History Show
Mark Tucker	5789	-	Male	American	History Show
Cha Thar	2010007	34 yrs, 1 mths, 0 days	Male	Burmese	History Show
Yu Ya	2010009	2 yrs, 6 mths, 20 days	Female	Karen	History Show
Daw Shwe	2010008	67 yrs, 1 mths, 0 days	Female	Karen	History Show
Aye Aye Myint	2010010	40 yrs, 1 mths, 0 days	Female	Burmese	History Show

Below the table, it says "6 Found".

The footer contains links for "Home", "Administration", "Reporting", and "Documentation". A note states: "LATRS has been developed by Bordermedia for the Mae Tao Clinic."

Click the "search" button to perform the search. You can click the "Reset" link to view all patients again. To close the search box, use the green cross to the right.

Patients: show

The main window only shows some of the information for each patient. To see all the information, click the “Show” link for that patient:

The screenshot shows a web browser window with the URL `eee-901-scm:3000/entry/patients/list`. The page title is "LATRS: Data Entry portal" and it includes a "development mode" warning. The date "01 August 2011" is displayed in the top right. A "Patients" section contains a table with columns: Name, Patient RN, Age, Gender, Ethnicity, and links for History and Show. The table lists three patients: Steven McPhillips, Mark Tucker, and Cha Thar. Below the table, a "Patient history" section for Cha Thar is expanded, showing details like Patient RN (2010007), Age (34 yrs, 1 mths, 0 days), Birthdate (1977-07-01), Gender (Male), Ethnicity (Burmese), and Location (TH-Mae Sot). A green cross icon is visible in the top right of this section. Below the patient details, a table lists three more patients: Yu Ya, Daw Shwe, and Aye Aye Myint. At the bottom, a navigation bar includes links for Home, Administration, Reporting, and Documentation, along with a footer note about the system's development by Bordermedia for the Mae Tao Clinic.

Name	Patient RN	Age	Gender	Ethnicity	History	Show

LATRS has been developed by [Bordermedia](#) for the [Mae Tao Clinic](#).

Click the green cross to the right to return to the normal list view.

Patients: history

You can view a patient's history by clicking the "History" link. This will show a list of all test results recorded for that patient:

The screenshot shows a web browser window with the URL `eee-901-scm:3000/entry/patients/list`. The page title is "LATRS: Data Entry portal" and it includes a "Laboratory Test Results System development mode" banner. The date "01 August 2011" is displayed in the top right. The main content area is titled "Patients" and features a search bar. Below this is a table of patients with columns for Name, Patient RN, Age, Gender, and Ethnicity. The table lists two patients: Steven McPhillips (RN: 123) and Mark Tucker (RN: 5789). Each patient entry has "History" and "Show" links. Below the patient list, there is a section titled "Test Results for Mark Tucker (RN: 5789)" with a search bar. This section contains a table of test results with columns for Requested, Type, Department, Staff, Time taken, and Sub-tests. The table shows three test results for Malaria, all performed by Steven on July 21, 2011, at 10:08 AM. Each test result has "Show" and "Delete" links. Below the test results table, there is a section titled "3 Found" and a table of patients with columns for Name, Patient RN, Age, Gender, and Ethnicity. The table lists four patients: Cha Thar (RN: 2010007), Yu Ya (RN: 2010009), Daw Shwe (RN: 2010008), and Aye Aye Myint (RN: 2010010). Each patient entry has "History" and "Show" links. Below the patient list, there is a section titled "6 Found". At the bottom of the page, there is a footer with links for Home, Administration, Reporting, and Documentation. A note states: "LATRS has been developed by Bordermedia for the Mae Tao Clinic."
